1. Applicant's election with traverse of Group I in the reply filed on 11/20/06 is acknowledged. The traversal is on the ground(s) that there is no serious burden for the examiner to search the groups together. This is not found persuasive because the search required for one groups is not required for the other groups.

The requirement is still deemed proper and is therefore made FINAL.

2. Claims 21-28 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 11/20/06.

3. Newly submitted claims 35-38 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: the originally elected group does not include the search for an insulating glass unit and as an immediate product can be used for another invention such as a mirror.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 35-38 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Art Unit: 1775

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-5,7-11,13-20 and 29-34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Veerasamy (6,713,179).

The examiner has reviewed the parent application 09/572,766 to be clear what information has been added to determine the effective filing date of the claimed content.

Veerasamy discloses a carbon coating on glass with the claimed contact angle (abstract). The coating may be in the claimed thickness (column 5, line 36) and include additional layers like silicon oxide, in between the carbon and glass substrate (column 7, lines 54-60). The claimed indexes of refraction are typical of silicon oxide layers. The carbon layer can be made more graphitic to improve the hydrophilic nature and contact angle (column 8, line 21-23).

Veerasamy does not explicitly disclose the claimed amount of graphite in the coating.

It would have been known to one of ordinary skill in the art to provide the carbon coating with the claimed amount of graphite, as this increase is known to improve the hydrophilic nature of the coating if that property is desired, as shown by the reference.

Veerasamy does not explicitly disclose the claimed metal/dielectric coating.

It would also been obvious to one of ordinary skill in the art to use the claimed ordering of metal/dielectric, as this ordering is known to be used on Low E coatings that are provided for in the reference.

6. Applicant's arguments with respect to claims 1-5,7-11,13-20 and 29-34 have been considered but are moot in view of the new ground(s) of rejection.

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
